Chemicals

These might
be recyclable,
**but are they
100% FOOD
SAFE?**

The risks of serving food **on unsafe disposables for your brand**

Most disposables available in the market contain harmful chemicals like microplastics, PFAs, ink, fiber, and other dangerous materials which leech into the food you serve.

It ultimately makes the food unsafe, no matter how much care you take while preparing, serving or storing.

Protecting your customers from foodborne illnesses is essential for maintaining trust and loyalty.

Serving 100% food safety, 0% Nasty

**Hygienically
manufactured**
